The Novagard 500 Series RTV products are alcohol cure silicones. They are non-corrosive, single component RTV products that are available as pastes and liquids. They are ideal for applications that require quick cures and early green strength development on electronic modules, circuit boards and other sensitive components. They have passed Mil Spec A-46146B testing.

500 Series Paste Products

Product	Color/ Appearance	Shore Hardness	Extrusion Rate	Tack Time	Full Cure Time	Specific Gravity
500-090	White/Paste	30-40 A	140 gm/min	15 min	24 hrs	1.30-1.40
500-092	Black/Paste	30-40 A	140 gm/min	15 min	24 hrs	1.30-1.40
500-150	Translucent/Paste	15-25 A	>200 gm/min	15 min	24 hrs	1.00-1.05

500 Series Flowable Products

Product	Color/ Appearance	Shore Hardness	Viscosity	Tack Time	Full Cure Time	Specific Gravity
500-257	Translucent/Liquid	10-20 A	20,000 - 40,000 cps	30 min	72 hrs	0.95-1.01
